Advance key workflows with Rhino Integrations

Rhino connects with industry-leading PMS solutions to automate applicant engagement, enhance protection, and create faster, more convenient leasing experiences.

Rhino integrates with today's leading PMS solutions

Rhino streamlines the leasing, renting, and renewal journey with smart, intuitive integrations. We've partnered with today's leading property management systems to enable better productivity and efficiency when welcoming new renters, accessing renter information, managing individual Rhino policies, and validating data across systems.

Three ways we've made integrating with Rhino a breeze

Busy teams don't have time to sort out complicated integrations. That's why we've made the process as simple as searching for Rhino in your PMS marketplace, selecting **Activate Integration**, and allowing our teams to handle the rest.

1 **We're verified as a vendor in your PMS marketplace.**

If you don't find us in a simple search, just provide your API user credentials, property data, and coverage to your Rhino Partner Success Representative.

2 **Our engineering team will handle syncing your data.**

Once an integration's been activated, we'll configure the integration to pull data directly from your property management software.

3 **We'll get your team trained and onboarded.**

You won't have to worry about your new integration confusing your staff — we'll get them up to speed on how to use Rhino so you can begin sending invitations right away.

Key benefits of integrating with Rhino

We've built APIs to integrate with best-in-class PMS tools to save you critical time and resources, all while giving you more opportunities to surprise and delight your residents.

Faster leasing

No more waiting for deposit payments. Rhino integrations create the fastest path from application to signing.

- Automate perfectly-timed invitations to new renters.
- Bypass administrative hassle and welcome a new Rhino renter right after they've paid their application fee.
- Pre-populate manual invitations using data that exists in your PMS.

Adjustable quotes

Enjoy optimized protection. Rhino can customize policies based on data that exists in your PMS.

- Automically adjust quotes to reflect your company preferences, renter risk profiles, and property types.
- Enjoy added assurance that each renter is paying an appropriate amount to protect your units.

All your data in one place

Access Rhino data right from your PMS. Keep a pulse on Rhino renter engagement with clear coverage updates.

- Allow your PMS to track renter engagement with Rhino, keeping you aware of how many units you have covered, which residents have taken a Rhino policy, and in what state.

Rhino is in demand: Integrations save time for busy leasing teams

You shouldn't have to worry about inviting renters to Rhino. By using our integrations to automate invitations, property teams have completely eliminated the need for a cash security deposit across their entire portfolio.

90% adoption

9 out of 10 renters who receive an invitation choose to enroll with Rhino.

92% partnerships expanded

The majority of our partners choose to expand their Rhino offering within 90 days of partnership.

Rhino is the preferred deposit insurance choice for the NMHC Top 50 Owners across the country.

"Our integrations team and property management systems speak the same language, so all our partners need to do is connect us together. We send tens of thousands of automated invites to renters every day."
